

BROOKLYN HOUSE NEWSLETTER

Thank you for another busy year, word of mouth referrals and referrals from other colleagues keep increasing and we will soon be increasing our opening hours to accommodate these.

Our Implant referrals are the fastest growing part of our business. Stephan (GDC 69012) and Diane (GDC 111167) now spend both Wednesday and Fridays on implant treatments alone. This has meant that those few NHS patients still on Stephan's list will be moved to Judith Casey (GDC 50529) or Louis Minnaar (GDC 48982).

Lizette Moolman (GDC 74365) undertook the challenging Certificate in Facial Aesthetics through the FGDP and Royal College of Surgeons of England. FREE consultations can be arranged (Botox and Fillers).

Our very popular dental therapist/hygienist Joanne Dow (GDC 227772) now works a full five days at our practice. Wednesday afternoons she undertakes ZOOM whitening and has been getting amazing results.

Soon we will be upgrading our computer hardware and software and ask you to be patient while we all try to master it. We will now be able to communicate by email so please let us have your email address.

Louis is available for all your orthodontic needs, remember you are never too old to have braces as technology has allowed us to drastically shorten the treatment time.

Should you wish to improve the cosmetic appearance of your teeth Judith Casey's skill and experience might be just what you need. She is a full member of the British Academy of Cosmetic Dentistry.

Denplan: Very soon we will be undergoing our Denplan Excel accreditation. Everyone has been working very hard in achieving this.

Some of you might have had your Denplan Care bands adjusted this year. This is an ongoing process to make sure everyone is in the correct bands. We ask for your patience while we gradually work through our list. In 2013 all of Stephan's patients were reviewed and in 2014 all Lizette's patients were reviewed.

We welcome 2 new members of staff, Chelsea Goodrick who is a qualified dental nurse, joined us in September and will be assisting Stephan 3 days a week.

We also have Georgia Holland who is a trainee dental nurse and joined us in October. Diane Robb, our newly appointed, practice manageress, will still be coordinating the Implant Clinic and will be assisting Stephan on Wednesdays and Fridays.

Congratulations to Hannah (GDC 206498) and Gav on the recent birth of their son Isaac. And belated congratulations to Louis (GDC 48982) and Petro on their 40th wedding anniversary and the birth of their first grandson.

Good Luck to Lizette and Ghretta (GDC 234791) who are training for the Norwich half marathon. Congratulations to Stephan for completing the Argus cycle tour, good luck in your next challenge.

Budgeting for your dental care

As a practice, we believe in providing our patients with as much choice as possible when it comes to paying for your dental treatment. Budgeting for your oral healthcare is simple with a dental payment plan such as Denplan Care which helps spread the cost of all your dental check-ups, hygienist visits, dental x-rays and any restorative treatment you may need, such as fillings, crowns, bridges and dentures, with a set monthly fee (lab fees not included).

If you are looking for a dental payment plan that covers your basic preventive dental care, Denplan Essentials is a dental plan which helps spread the cost of your dental check-ups, hygienist visits and dental x-rays. We will also give you a discount off many dental treatments (exclusions may apply).

Even better, all Denplan payment plans include Supplementary Insurance – worldwide dental injury and dental emergency cover – as well as mouth cancer cover (cover not immediate).

Stub out your smoking habit

Smoking increases the risk of developing mouth cancer by a massive five times, and it is also linked to lung cancer, heart disease, strokes, premature and low weight babies, and gum disease, which can lead to tooth loss.

From a cosmetic point of view, smoking can cause premature wrinkles, ageing, stained hands and yellow teeth. With the above facts in mind, quitting smoking will help you to look and feel better. Statistics show that receiving cessation support can significantly improve your chances of successfully quitting smoking, and the practice team would be delighted to help you give up – for good! Speak to a member of the team for more details of smoking cessation support.

Looking after your oral health can help to look after your teeth and gums as well as improve your overall health and wellbeing.

Making sure you're brushing and flossing properly.

Eating the right foods for both your body and your teeth.

Keeping an eye on your alcohol intake

Taking steps to quit smoking.

You
don't have
to 
BRUSH ALL YOUR TEETH—
Just the ones you want to keep.

Brooklyn House team would like to thank you for your continued support
